Purplemath

<D:\spring 2023\Links for website>

This free site has notes and videos on performing many algebra techniques.

"[Purple Math's algebra lessons](#) are informal in their tone and are written with the struggling student in mind. Don't worry about overly-professorial or confusing language! The free [lessons](#) on this math website emphasize the practicalities rather than the technicalities, demonstrating dependably helpful techniques, warning of likely "trick" test questions, and pointing out common student mistakes. ([Purplemath.](#))"

<https://writingprocess.mit.edu/process/step-1-generate-ideas>

The screenshot shows the MIT Writing Process website. The header includes the logo for the Global Studies and Languages (GSL) department at MIT, with the text 'The Writing Process' and the tagline 'Making expository writing less stressful, more efficient, and more enlightening'. A navigation menu on the left lists: Home, Background, Step 1: Generate Ideas (with sub-items: Brainstorming, Freewriting, Idea Map/Web, 'Moodling'), Step 2: Plan And Organize, Step 3: Draft, Step 4: Revise, Step 5: Edit, and Final Thoughts. A 'Login using Touchstone' link is at the bottom left. The main content area is titled 'Step 1: Generate Ideas' and features a quote from Albert Einstein: 'If at first the idea is not absurd, then there is no hope for it.' It includes an image of a person shouting into a megaphone. Below the quote, the text explains that the first step is to generate ideas for your project, often called 'gathering' because it includes research. A second image shows a person sitting at a desk with a typewriter. The text concludes by stating that in expository writing, you will want to 'generate ideas' first, and the methods below will help you define what questions you want to start your research with.

This site walks the student through the writing process, from generating an idea to editing.
